Subject: Modular Approval Statement

Date: April 11, 2019

FCC Certification Number: 2AFIW-SH32BZ Model Name/Number: GL-EFR32S, GL-EFR32H

TO WHOM IT MAY CONCERN

Pursuant to Paragraphs CFR § 15.212, we herewith declare for our module.

(a) The radio elements must have the radio frequency circuitry be shielded. Physical/discrete and tuning capacitors may be located external to the shield, but must be on the module assembly. *Please provide a detailed explanation if the answer is "No.": (b) The module shall have buffered modulation/data input(s) (if such inputs are provided) to ensure that the module will comply with the requirements set out in the applicable standard under conditions of excessive data rates or overmodulation. *Please provide a detailed explanation if the answer is "No.": (c) The module shall have its own power supply regulation on the module. This is to ensure that the module will comply with the requirements set out in the applicable standard regardless of the design of the power supplying circuitry in the host device which houses the module. *Please provide a detailed explanation if the answer is "No.": (d) The module shall comply with the provisions for external power amplifiers and antennas detailed in this standard. The equipment certification submission shall contain a detailed description of the configuration of all antennas that will be used with the module. *Please provide a detailed explanation if the answer is "No.": (e) The module shall be tested for compliance with the applicable standard in a stand-alone configuration, i.e. the module must not be inside another device during testing. *Please provide a detailed explanation if the answer is "No.": (f) The module shall comply with labeling requirements and CFR § 15.212(a) Yes *Please provide a detailed explanation if the answer is "No.":	Modular approval requirement	Yes	No *
(b) The module shall have buffered modulation/data input(s) (if such inputs are provided) to ensure that the module will comply with the requirements set out in the applicable standard under conditions of excessive data rates or overmodulation. *Please provide a detailed explanation if the answer is "No.": (c) The module shall have its own power supply regulation on the module. This is to ensure that the module will comply with the requirements set out in the applicable standard regardless of the design of the power supplying circuitry in the host device which houses the module. *Please provide a detailed explanation if the answer is "No.": (d) The module shall comply with the provisions for external power amplifiers and antennas detailed in this standard. The equipment certification submission shall contain a detailed description of the configuration of all antennas that will be used with the module. *Please provide a detailed explanation if the answer is "No.": (e) The module shall be tested for compliance with the applicable standard in a stand-alone configuration, i.e. the module must not be inside another device during testing. *Please provide a detailed explanation if the answer is "No.": (f) The module shall comply with labeling requirements and CFR § 15.212(a) Yes	Physical/discrete and tuning capacitors may be located external to the shield,	Yes	
provided) to ensure that the module will comply with the requirements set out in the applicable standard under conditions of excessive data rates or overmodulation. *Please provide a detailed explanation if the answer is "No.": (c) The module shall have its own power supply regulation on the module. This is to ensure that the module will comply with the requirements set out in the applicable standard regardless of the design of the power supplying circuitry in the host device which houses the module. *Please provide a detailed explanation if the answer is "No.": (d) The module shall comply with the provisions for external power amplifiers and antennas detailed in this standard. The equipment certification submission shall contain a detailed description of the configuration of all antennas that will be used with the module. *Please provide a detailed explanation if the answer is "No.": (e) The module shall be tested for compliance with the applicable standard in a stand-alone configuration, i.e. the module must not be inside another device during testing. *Please provide a detailed explanation if the answer is "No.": (f) The module shall comply with labeling requirements and CFR § 15.212(a) Yes (f) The module shall comply with labeling requirements and CFR § 15.212(a)	*Please provide a detailed explanation if the answer is "No.":		·
(c) The module shall have its own power supply regulation on the module. This is to ensure that the module will comply with the requirements set out in the applicable standard regardless of the design of the power supplying circuitry in the host device which houses the module. *Please provide a detailed explanation if the answer is "No.": (d) The module shall comply with the provisions for external power amplifiers and antennas detailed in this standard. The equipment certification submission shall contain a detailed description of the configuration of all antennas that will be used with the module. *Please provide a detailed explanation if the answer is "No.": (e) The module shall be tested for compliance with the applicable standard in a stand-alone configuration, i.e. the module must not be inside another device during testing. *Please provide a detailed explanation if the answer is "No.": (f) The module shall comply with labeling requirements and CFR § 15.212(a) Yes (1) (vi).	provided) to ensure that the module will comply with the requirements set out in the applicable standard under conditions of excessive data rates or over-	Yes	
is to ensure that the module will comply with the requirements set out in the applicable standard regardless of the design of the power supplying circuitry in the host device which houses the module. *Please provide a detailed explanation if the answer is "No.": (d) The module shall comply with the provisions for external power amplifiers and antennas detailed in this standard. The equipment certification submission shall contain a detailed description of the configuration of all antennas that will be used with the module. *Please provide a detailed explanation if the answer is "No.": (e) The module shall be tested for compliance with the applicable standard in a stand-alone configuration, i.e. the module must not be inside another device during testing. *Please provide a detailed explanation if the answer is "No.": (f) The module shall comply with labeling requirements and CFR § 15.212(a) Yes (1) (vi).	*Please provide a detailed explanation if the answer is "No.":		
(d) The module shall comply with the provisions for external power amplifiers and antennas detailed in this standard. The equipment certification submission shall contain a detailed description of the configuration of all antennas that will be used with the module. *Please provide a detailed explanation if the answer is "No.": (e) The module shall be tested for compliance with the applicable standard in a stand-alone configuration, i.e. the module must not be inside another device during testing. *Please provide a detailed explanation if the answer is "No.": (f) The module shall comply with labeling requirements and CFR § 15.212(a) (1) (vi).	is to ensure that the module will comply with the requirements set out in the applicable standard regardless of the design of the power supplying circuitry in	Yes	
and antennas detailed in this standard. The equipment certification submission shall contain a detailed description of the configuration of all antennas that will be used with the module. *Please provide a detailed explanation if the answer is "No.": (e) The module shall be tested for compliance with the applicable standard in a stand-alone configuration, i.e. the module must not be inside another device during testing. *Please provide a detailed explanation if the answer is "No.": (f) The module shall comply with labeling requirements and CFR § 15.212(a) Yes (1) (vi).	*Please provide a detailed explanation if the answer is "No.":		
(e) The module shall be tested for compliance with the applicable standard in a stand-alone configuration, i.e. the module must not be inside another device during testing. *Please provide a detailed explanation if the answer is "No.": (f) The module shall comply with labeling requirements and CFR § 15.212(a) Yes (1) (vi).	and antennas detailed in this standard. The equipment certification submission shall contain a detailed description of the configuration of all antennas that will	Yes	
stand-alone configuration, i.e. the module must not be inside another device during testing. *Please provide a detailed explanation if the answer is "No.": (f) The module shall comply with labeling requirements and CFR § 15.212(a) Yes (1) (vi).	*Please provide a detailed explanation if the answer is "No.":		1
(f) The module shall comply with labeling requirements and CFR § 15.212(a) Yes (1) (vi).	stand-alone configuration, i.e. the module must not be inside another device	Yes	
(1) (vi).	*Please provide a detailed explanation if the answer is "No.":		•
*Please provide a detailed explanation if the answer is "No.":		Yes	
	*Please provide a detailed explanation if the answer is "No.":		

(g) The module shall comply with applicable FCC RF exposure requirement which are based on the intended use/configurations.	Yes	
*Please provide a detailed explanation if the answer is "No.":		
(i) The modular transmitter complies with all applicable FCC rules. Instructions for maintaining compliance are given in the user instructions.	Yes	

If you have any questions, please feel free to contact us at the address shown below

Best Regards,

Their Tian
